# WHAT IS CRYPTO CURRENCY ?

Cryptocurrency is a digital payment system that doesn't rely on banks to verify transactions. It's a peer-to-peer system that can enable anyone anywhere to send and receive payments. Instead of being physical money carried around and exchanged in the real world, cryptocurrency payments exist purely as digital entries to an online database describing specific transactions. When you transfer cryptocurrency funds, the transactions are recorded in a public ledger. Cryptocurrency is stored in digital wallets.

# CRYPTOCURRENCY AND THEIR WORKING

Cryptocurrency is the digital currency unlike the traditional tangible currencies, it serves all the purposes of a currency with some additional benefits. Cryptocurrencies are decentralized and inflation proof since they are governed by nobody. They have emerged as a lucrative sector to early bird investors and now they are making headlines with their strong presence in the world. Governments and institutions are still meditating whether to approve it or reject it. Both options are a threat to existing bodies as approval to cryptocurrency can challenge the fiat currencies directly and ban is almost impossible due to its advanced features. So, the only option left is launch cryptocurrencies of their own because it is what that future belongs to.

Cryptocurrencies work on an advanced blockchain technology where peer-to-peer transactions take place and no confidential data needs to be disclosed. This network works globally.

# STRATEGY

ZPIX COIN

Since we are in a transition phase where urbanization is taking place rapidly and rural culture is vanishing. The city lifestyles are making people sick and forcing them to be in a race of establishing and sustaining luxuries. Such pressure is bound to explode some day, one cannot survive by killing their dreams or family time. So **ZPIX COIN** as a solution has brought a new blend of three essential elements, needs, money and technology.

Needs are served perfectly with regular generation of money through technology.
